## **Solar Manufacturers Coalition Statement on Proposed Clean Energy Manufacturing Tax Credit Repeal**

**Washington, D.C.** – In response to Speaker McCarthy’s inclusion of the Inflation Reduction Act’s clean energy tax incentives on his proposed list of demands to raise the debt limit, the [Solar Energy Manufacturing for America \(SEMA\) Coalition](#) issued the following statement from **Executive Director Mike Carr**:

“The clean energy manufacturing tax credits have already spurred billions of dollars of investments and the promise of millions of new good-paying jobs, throughout the country. Repealing these popular clean energy incentives would be an extraordinarily dangerous business proposition that would doom the United States’ ability to establish a resilient, domestic solar supply chain.”
