**Solar Manufacturers Coalition Statement on 48C Advanced Manufacturing Guidance
Issued by the U.S. Treasury Department**

We applaud the Biden Administration for their guidance issued today on the Section 48C Advanced Manufacturing Tax Credit of the Inflation Reduction Act. This approach will help the companies interested in building here in the United States to access critical resources and will allow for more investment in distressed communities that need these manufacturing jobs. The SEMA Coalition will continue to push this Administration to implement the IRA in a way that levels the playing field for American manufacturers across the country.
